# Time and Attendance Solutions

## Time and Attendance Software

BioSyn is a leader in delivering comprehensive clocking system software and time and attendance solutions in South Africa and around the world, catering to both startups and large corporations.

### Manage Clock Entries

The Clock Management or Time Entry screen, allows a user to easily manage entries on a daily basis.

### Control Access

BioSyn allows you to manage access on multiple levels. This helps to ensure that users only access the data they are supposed to access.

### Rostering

Automated Rostering offers a wide array of advantages over manual methods, therefore making it the preferred choice for modern organizations.

### Export

Our Export Overview screen serves as a valuable tool for monitoring batch statuses, particularly when dealing with numerous batches and companies within the system's registration.

### Reports

Use our fast report engine to quickly view detailed and summarized employee reports, this can be customized per user to ensure each type of user sees their data.

### Wellness & Statistics

Comprehensive statistical data provides you with better control over your productivity hours. Greatly reduce overtime or decrease short time.

## Why Choose Us!

Our goal is to make your sign-up and setup process as smooth as possible. If you encounter any issues along the way, our team is always available to help. With expertise in the latest technology, we are committed to providing the highest level of support.

## About BioSyn

BioSyn is a South African based company which specializes in Time and Attendance and Access Control solutions for all businesses, no matter the size or the unique niche they occupy within the industry. Where many companies focus on the product or service to be delivered, we prefer to focus on the goals of the product and service, we set out and work with a clear strategic plan to achieve the goals.

## Device Integrations

BioSyn empowers you to evolve without breaking the bank, preserving your resources while enjoying the benefits of state-of-the-art software integration. Experience the next level of technology with BioSyn's cutting-edge hardware integration options.

## Hardware

We offer competitive pricing on cutting-edge biometric authentication options including facial recognition, palm recognition, fingerprint scanning, RFID cards, and password capabilities. Choose from a wide range of devices tailored to your specific needs, from entry-level options to expert access control solutions.

## Mobile Application

With the BioSyn App, tracking your work hours has never been more convenient. It ensures accurate timekeeping while maintaining user-friendly features to streamline your experience.
