

# Mobile Application Solution

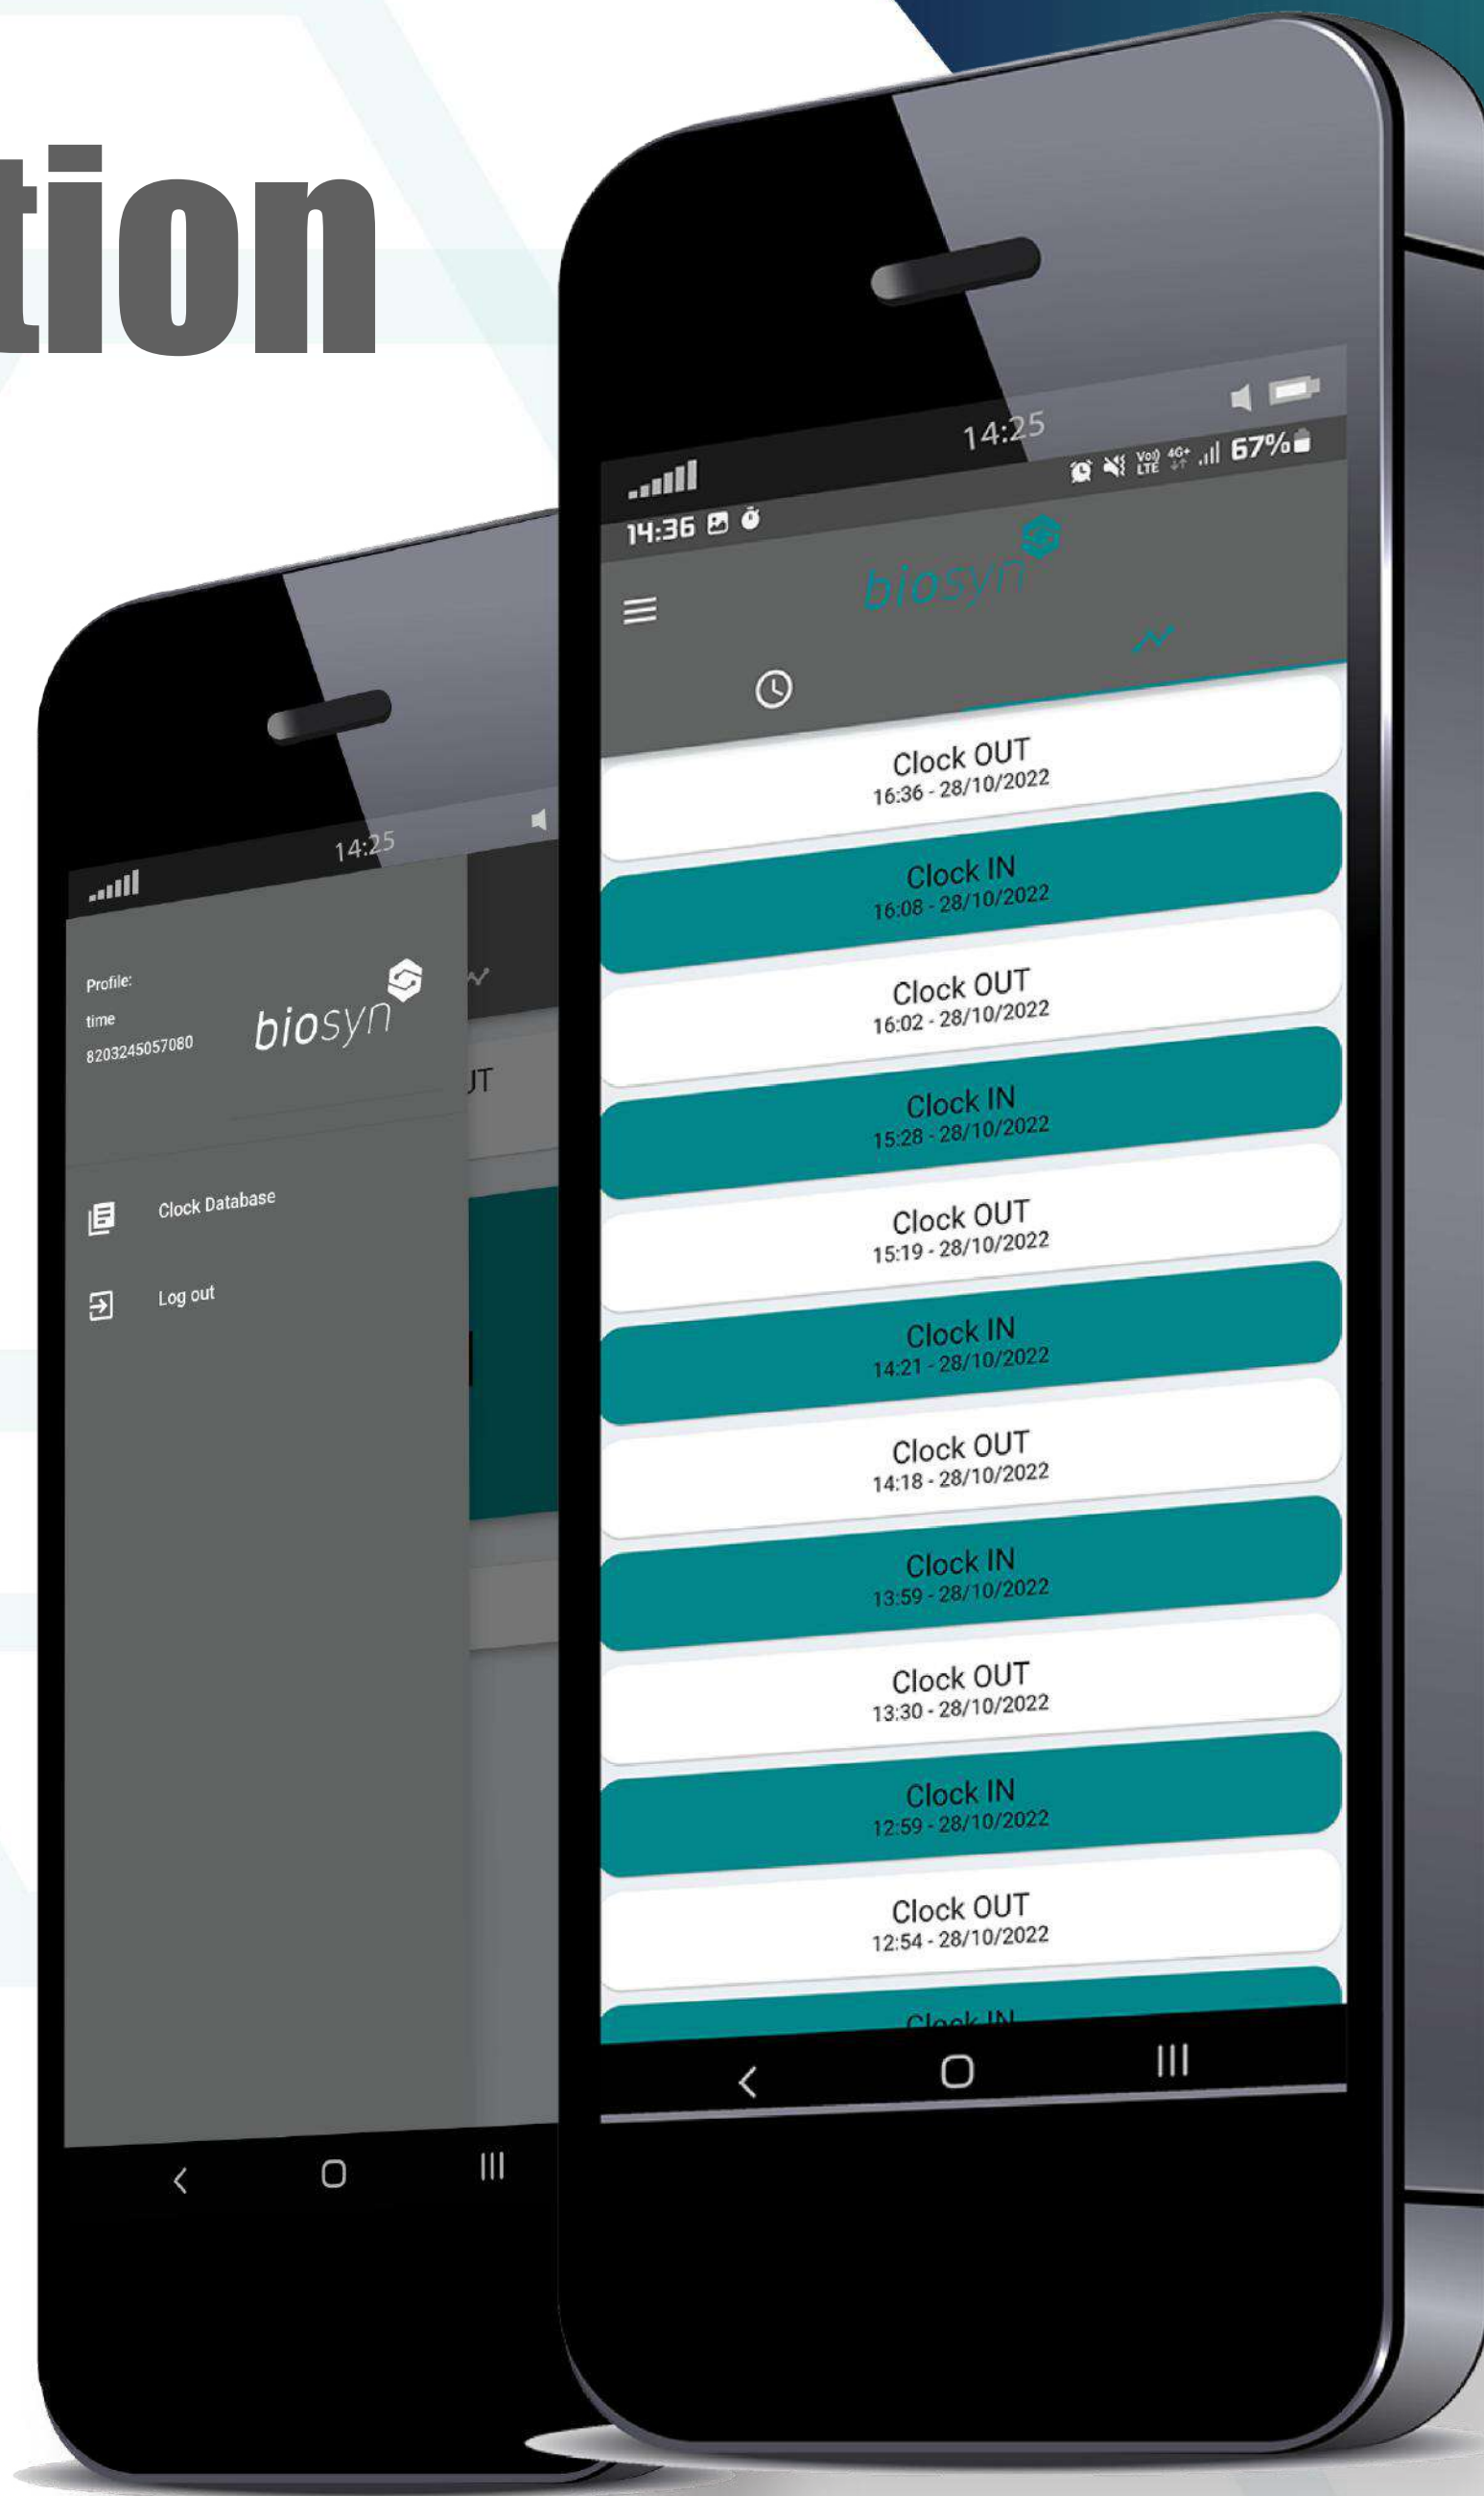

**Mobile Clocking - remotely, anywhere, anytime.**

*biosyn*

*Innovation. Passion. People.*

---

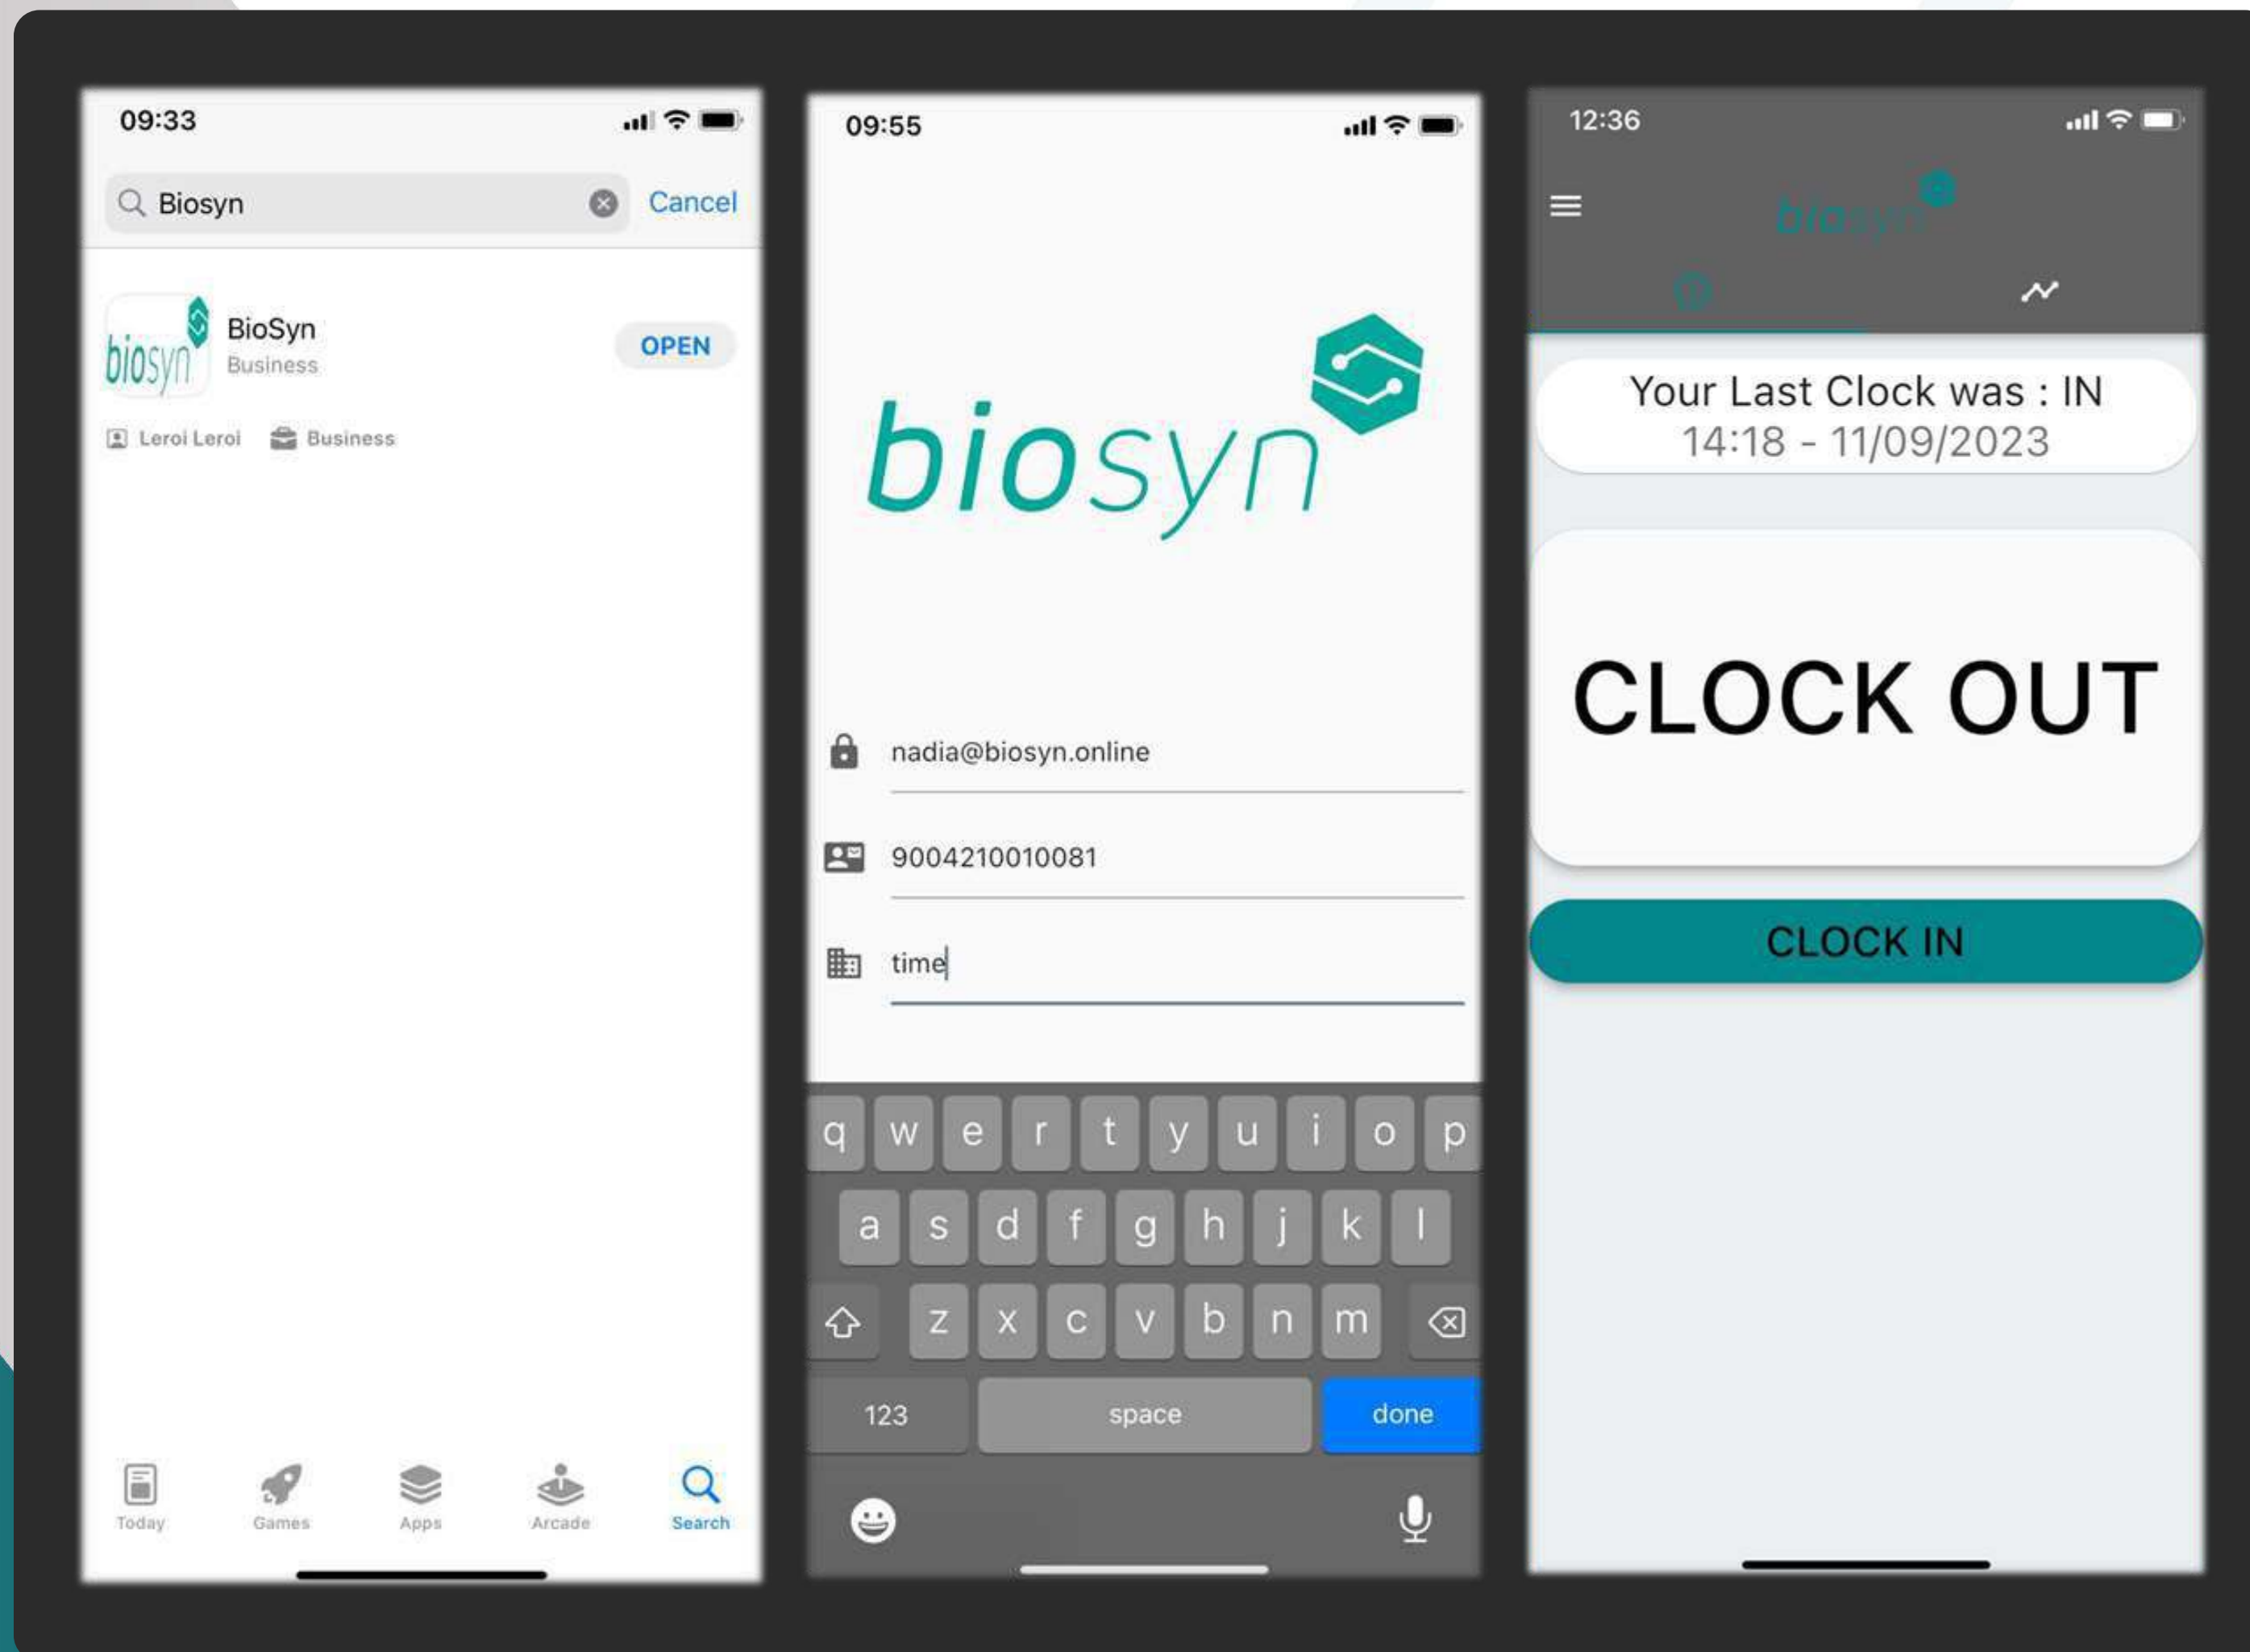

# Key Features

- Android and Apple Compatible - Available on Google Play Store, iStore and Findorra (Huawei App Gallery).
- Switch between individual or supervisor clocking capabilities per device.
- Photo capturing is available on supervisor-user clocking.
- View photo images displayed on BioSyn Time and Attendance software.
- Offline Capabilities - Clocking data is stored offline and uploads data as soon as an internet connection is detected.
- Capture GPS coordinates on every clock entry. Alternatively, disable GPS location clocking.
- Add a Geo-fenced radius around sites or departments.
- Custom development available on request.
- Comments: Employee can optionally comment per clocking.
- Odometer Reading: Odometer reading entry and photo capability is available.

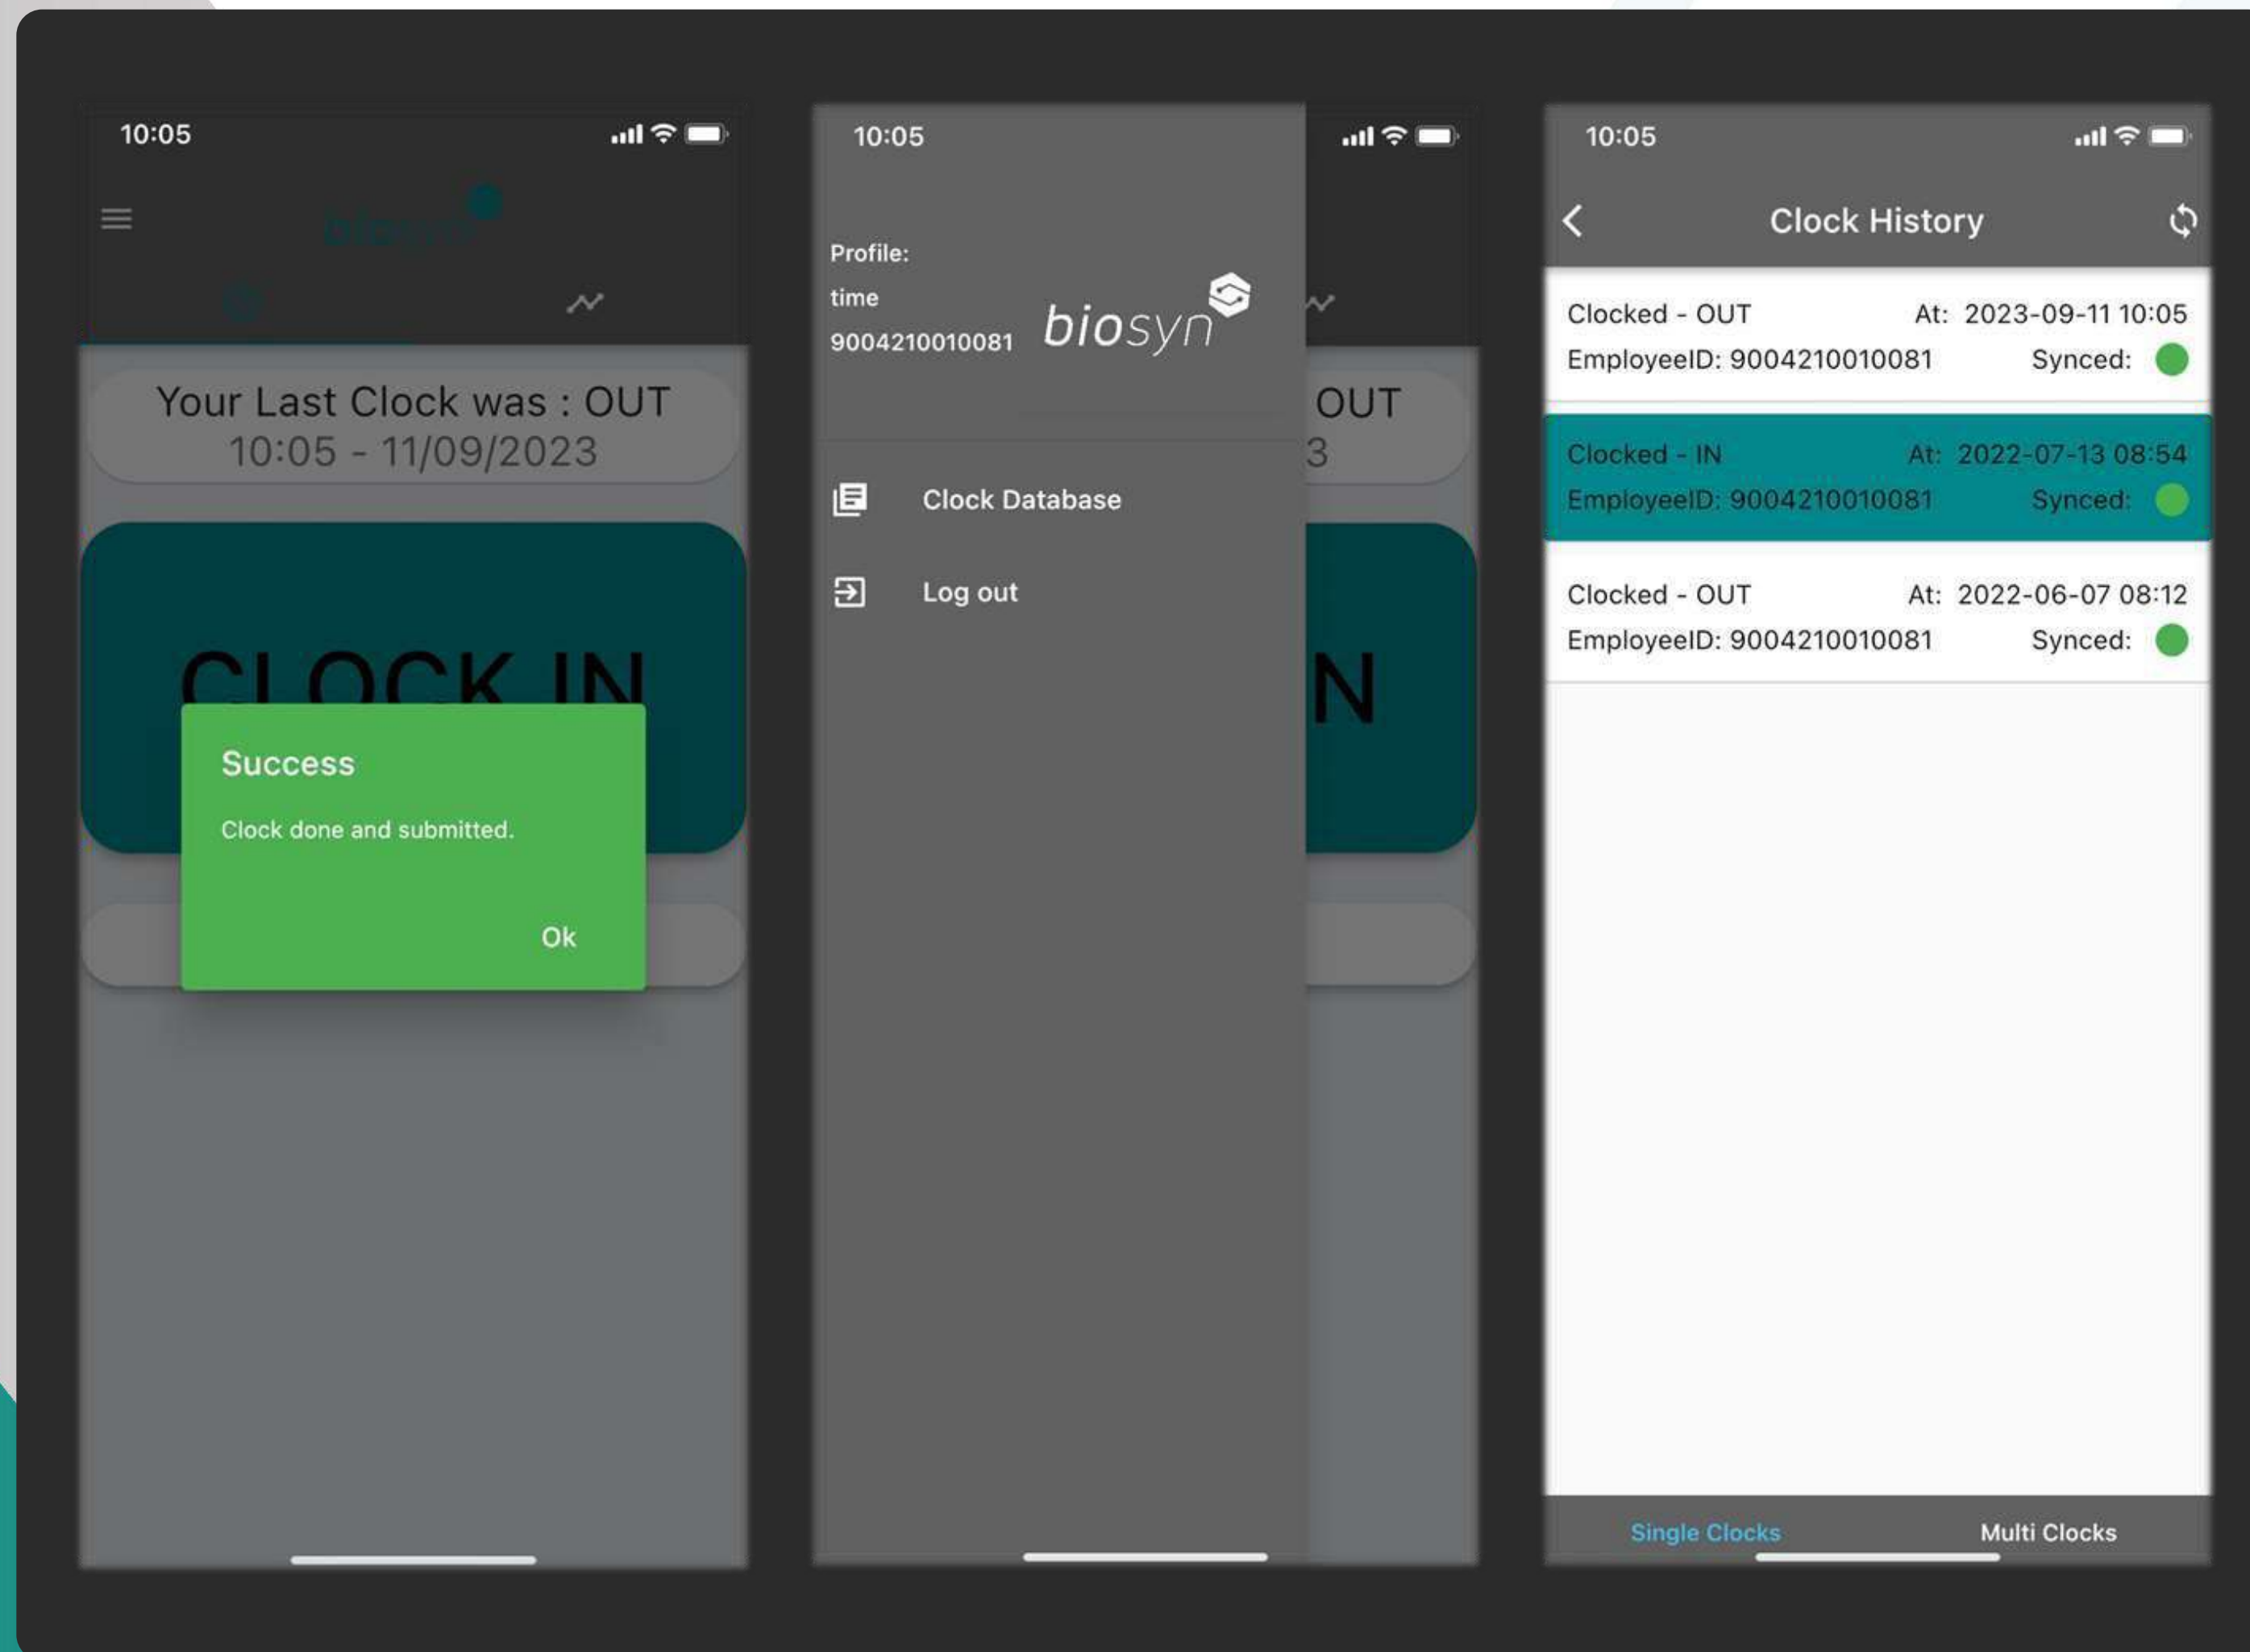

# Individual Clocking

## Getting started is a breeze!

1. Download the BioSyn App from Google Play Store, iStore or Findorra.
2. Open the BioSyn App on your mobile device.
3. Complete the details:
  - Email Address
  - ID Number
  - Company Code
4. Clock in and out with ease:
  - Location to be confirmed as soon as entry is submitted.

**5.** Confirm your “Clock In” by selecting “Yes”  
- If clocking is successful, a notification will confirm success.

**6.** Select Clock database to view historic/previous clock entries.

**7.** Select log out, to log in to supervisor login.

With the BioSyn App, tracking your work hours has never been more convenient.

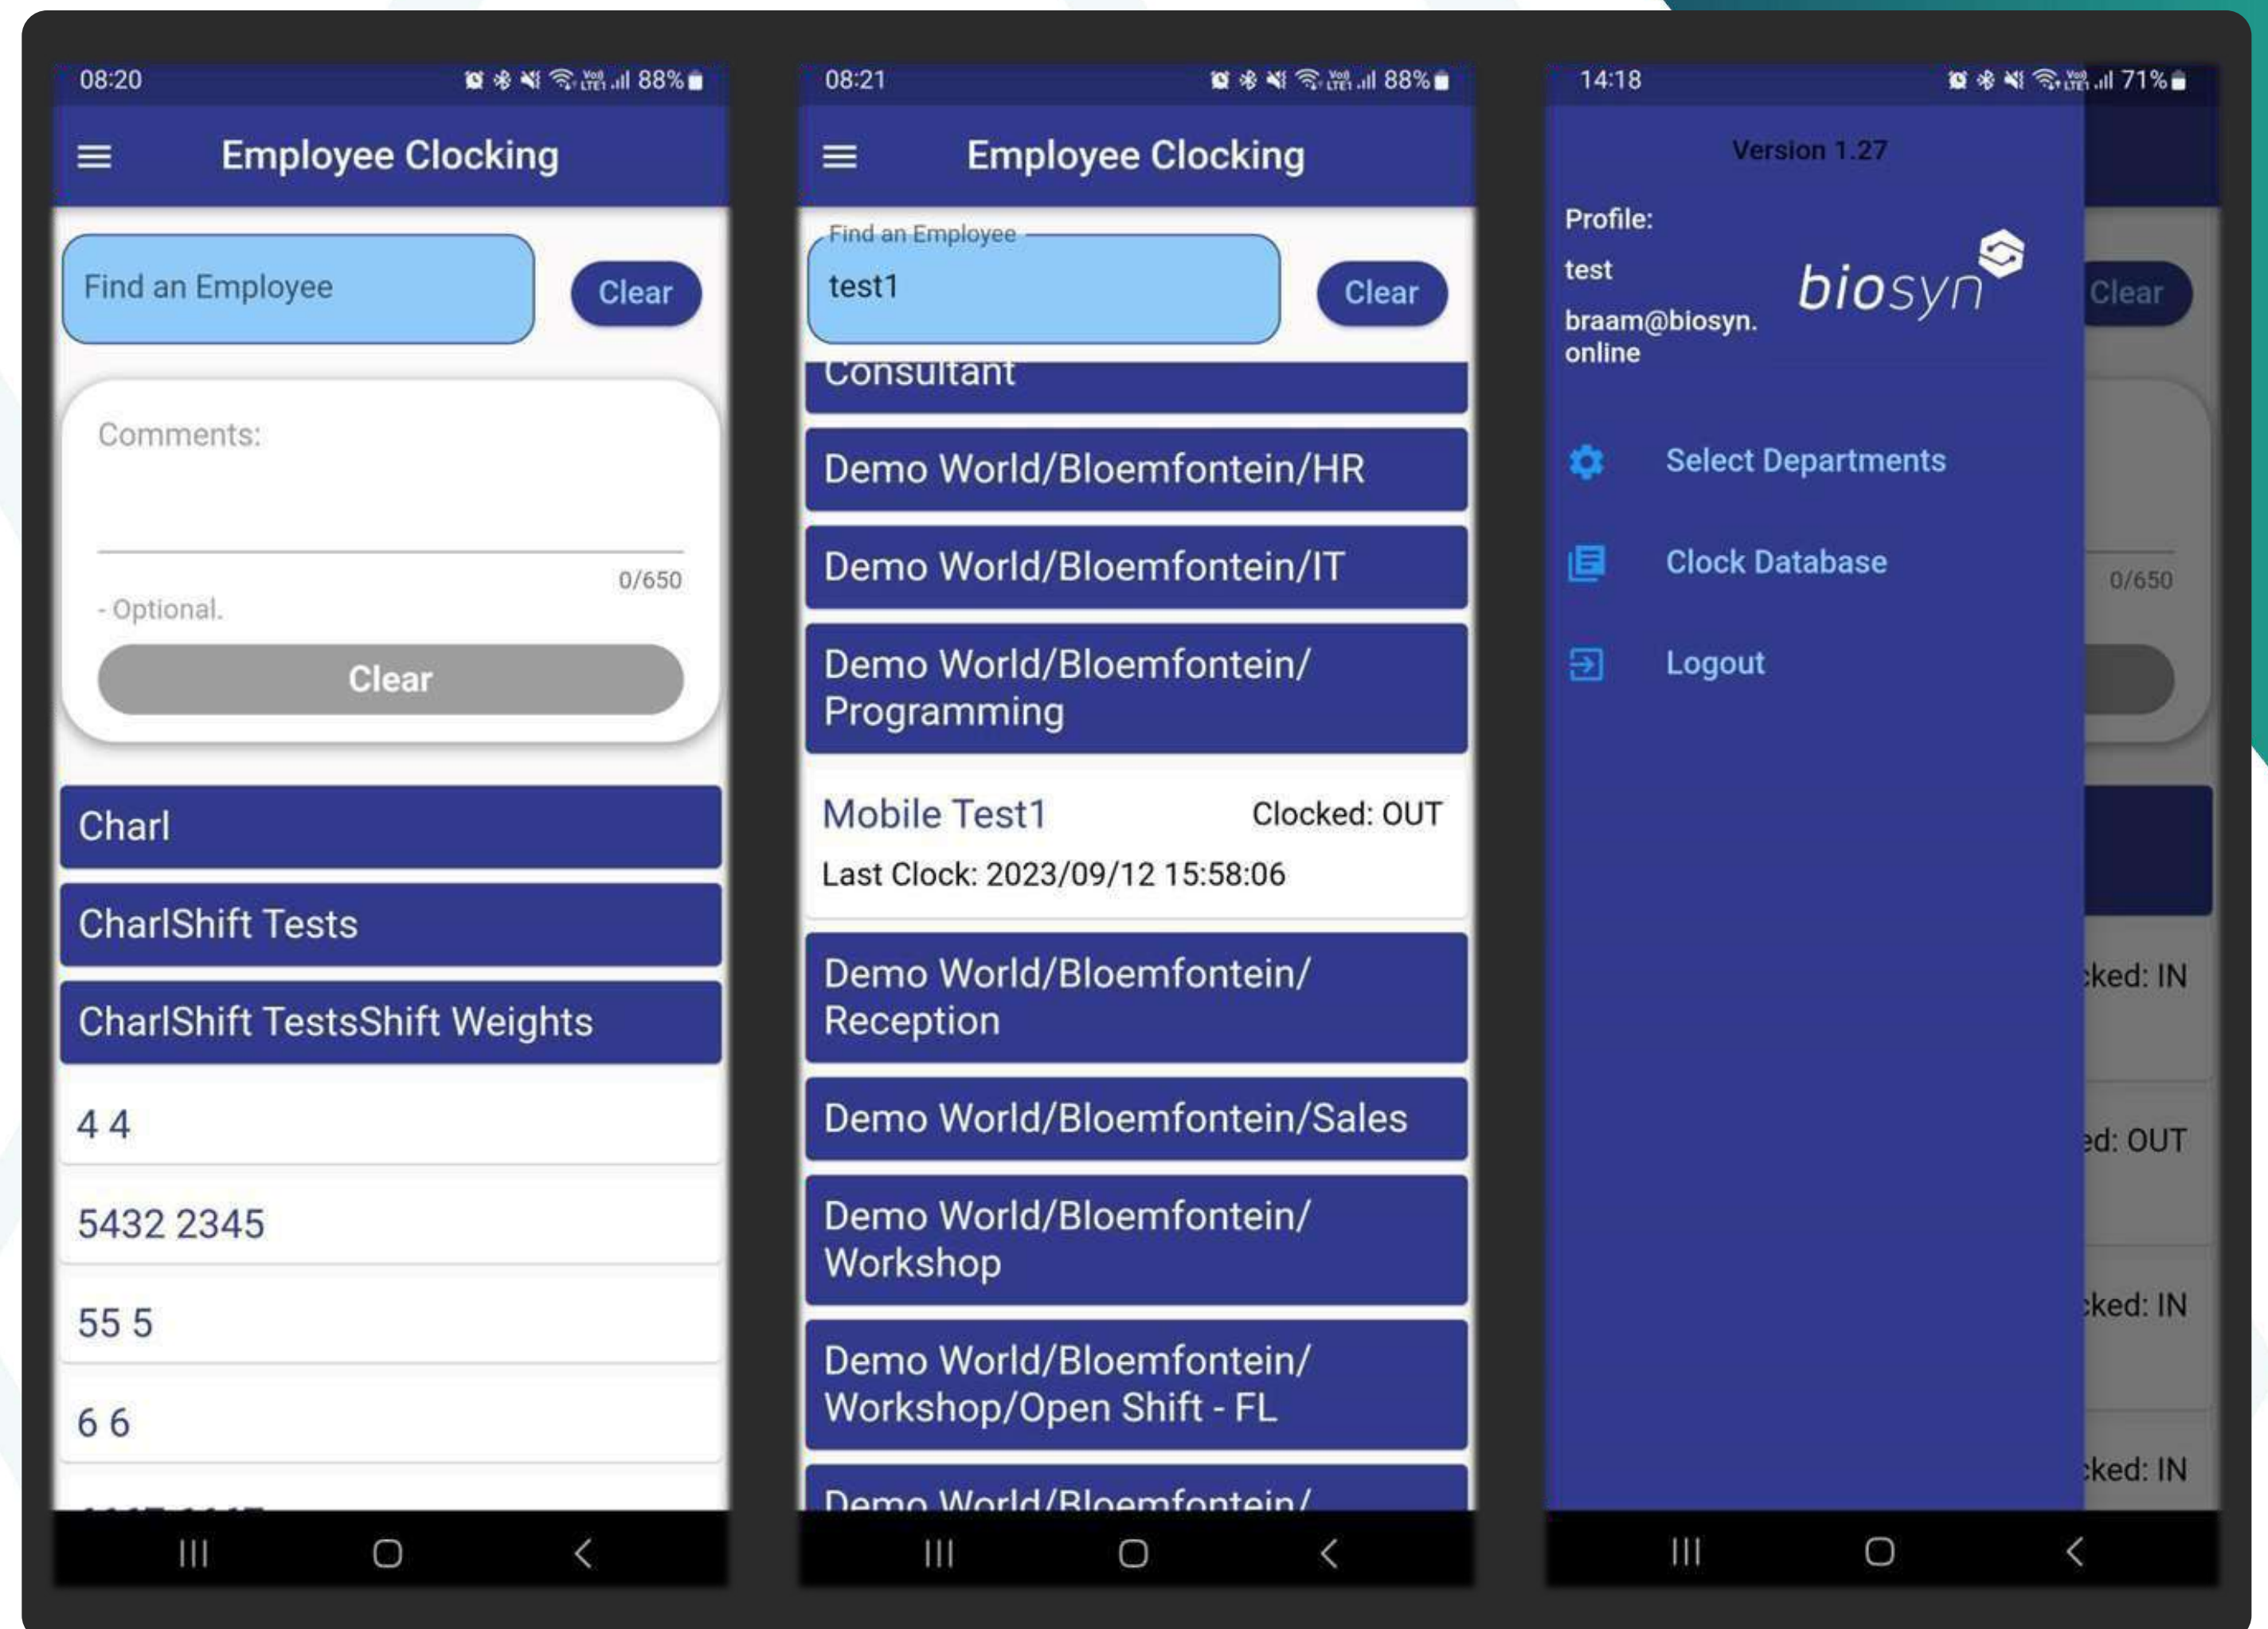

It ensures accurate timekeeping while maintaining user-friendly features to streamline your experience.

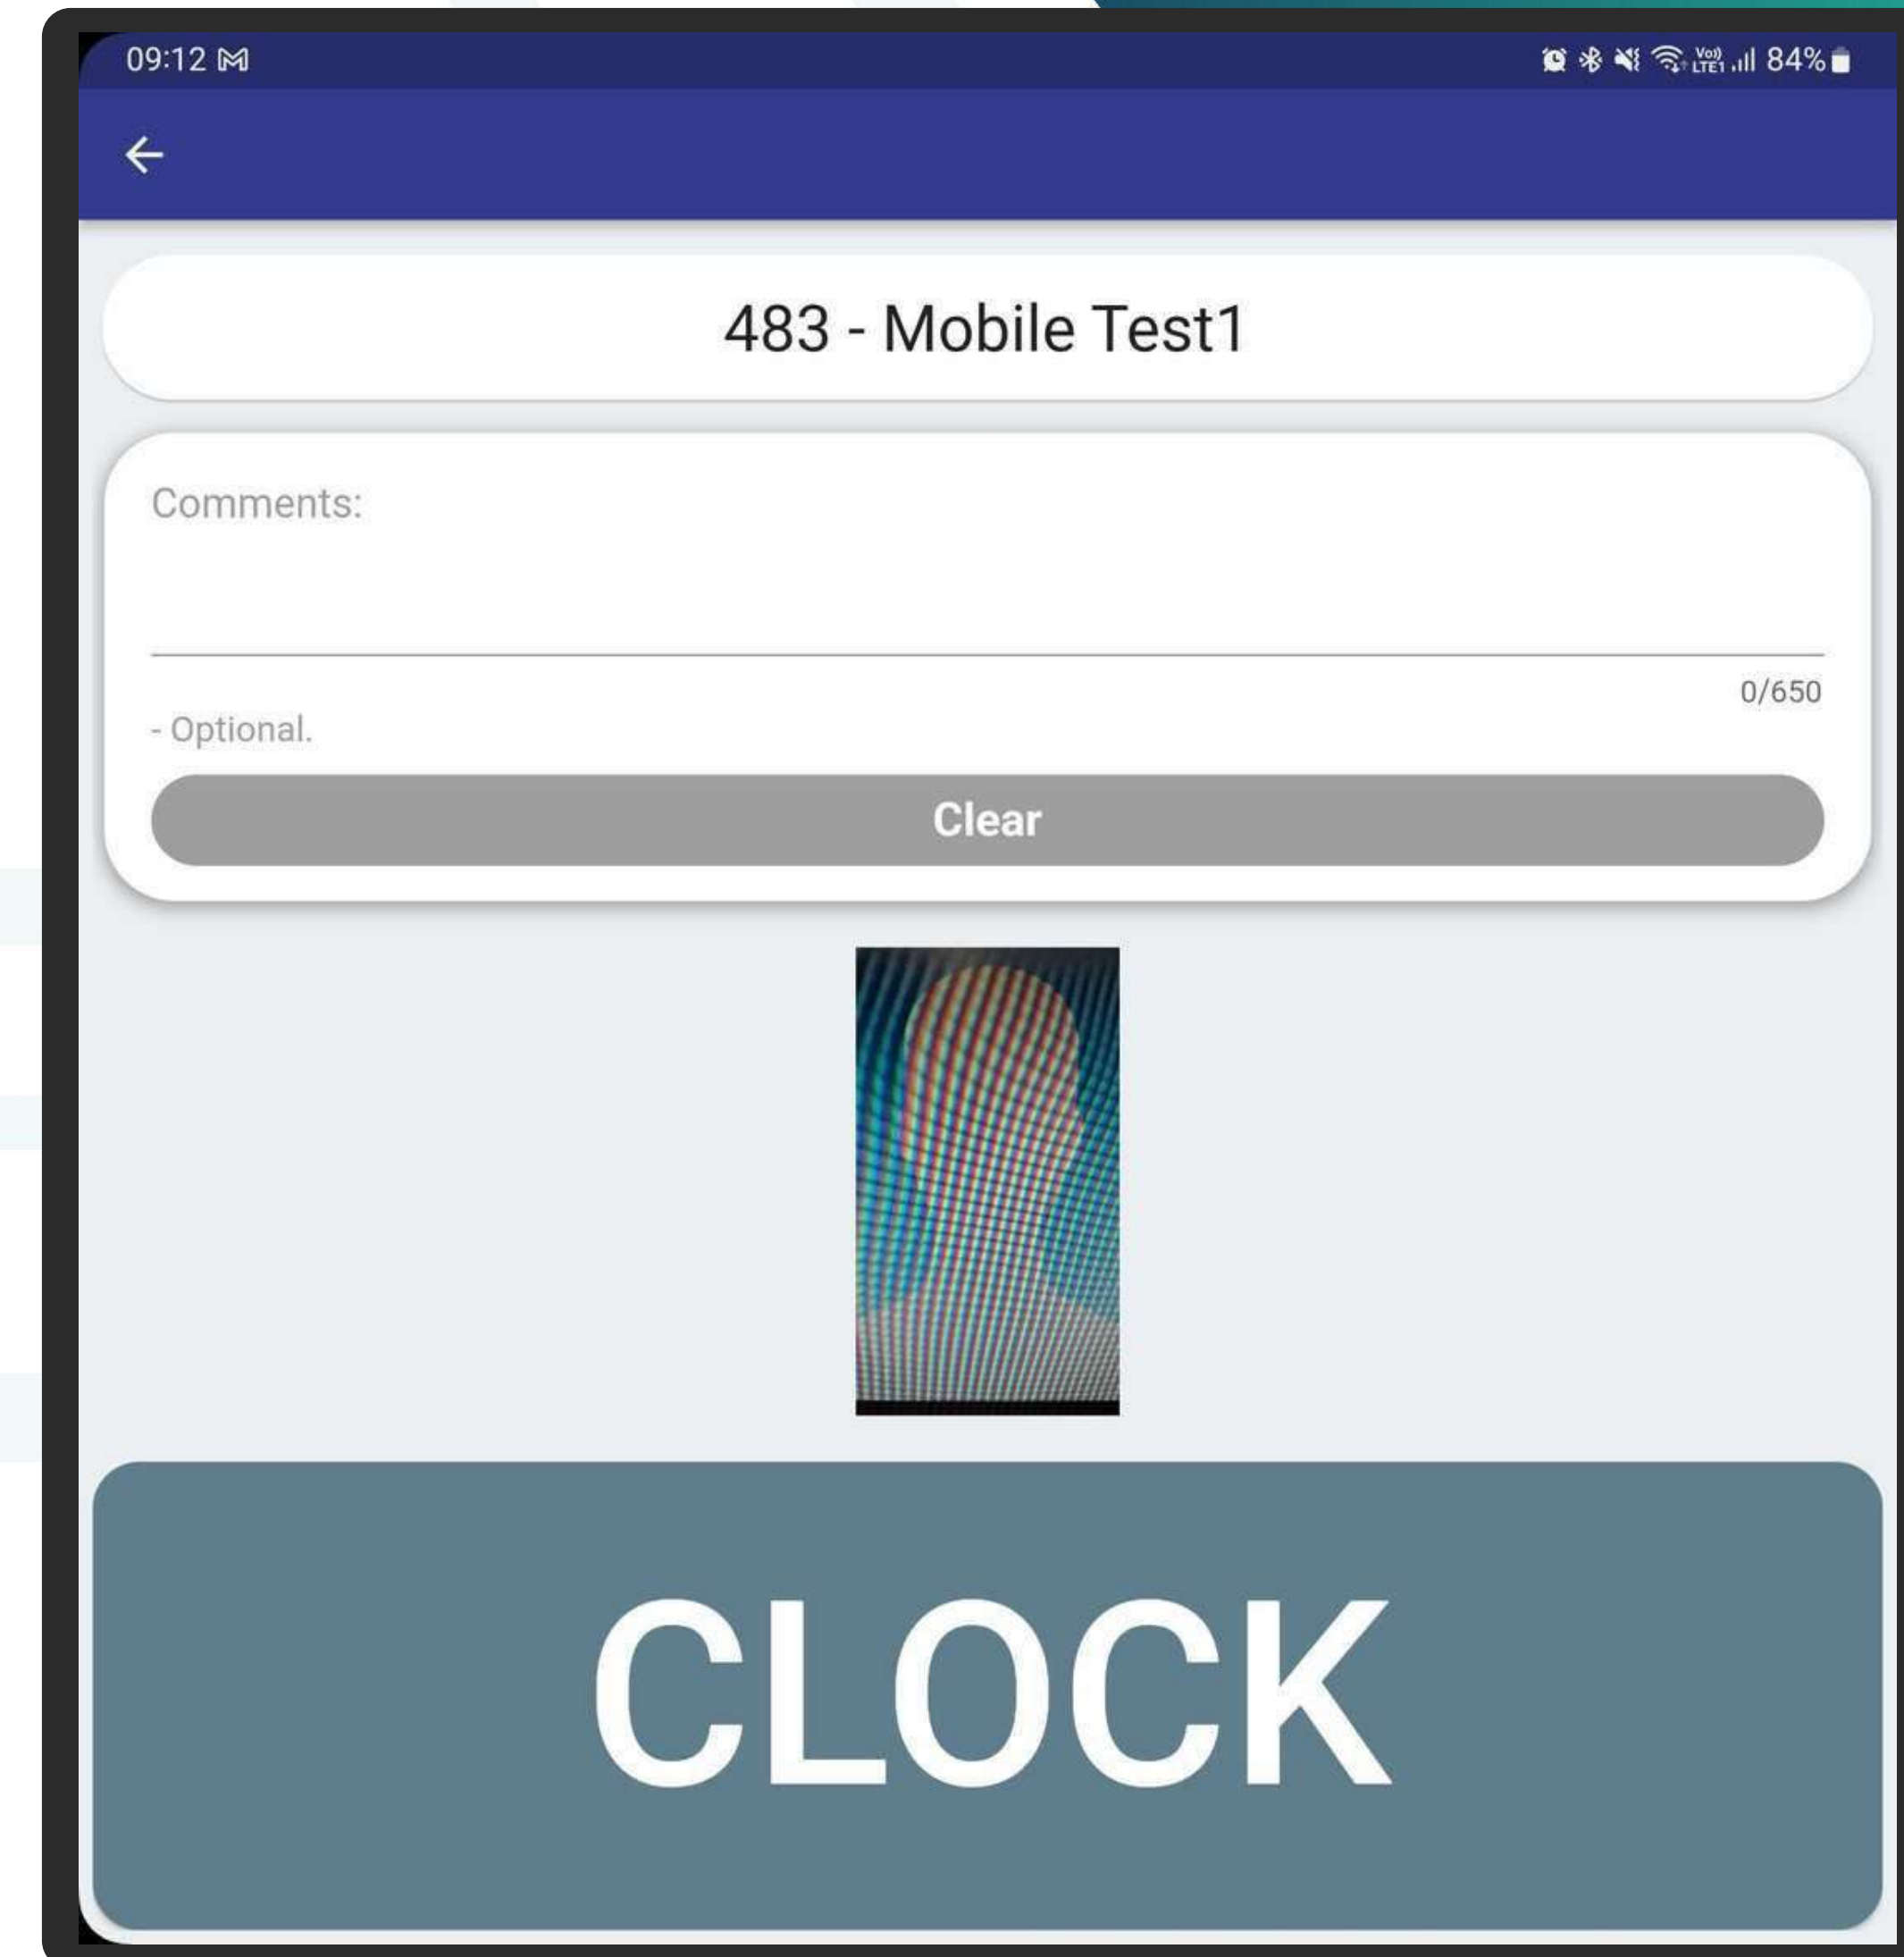

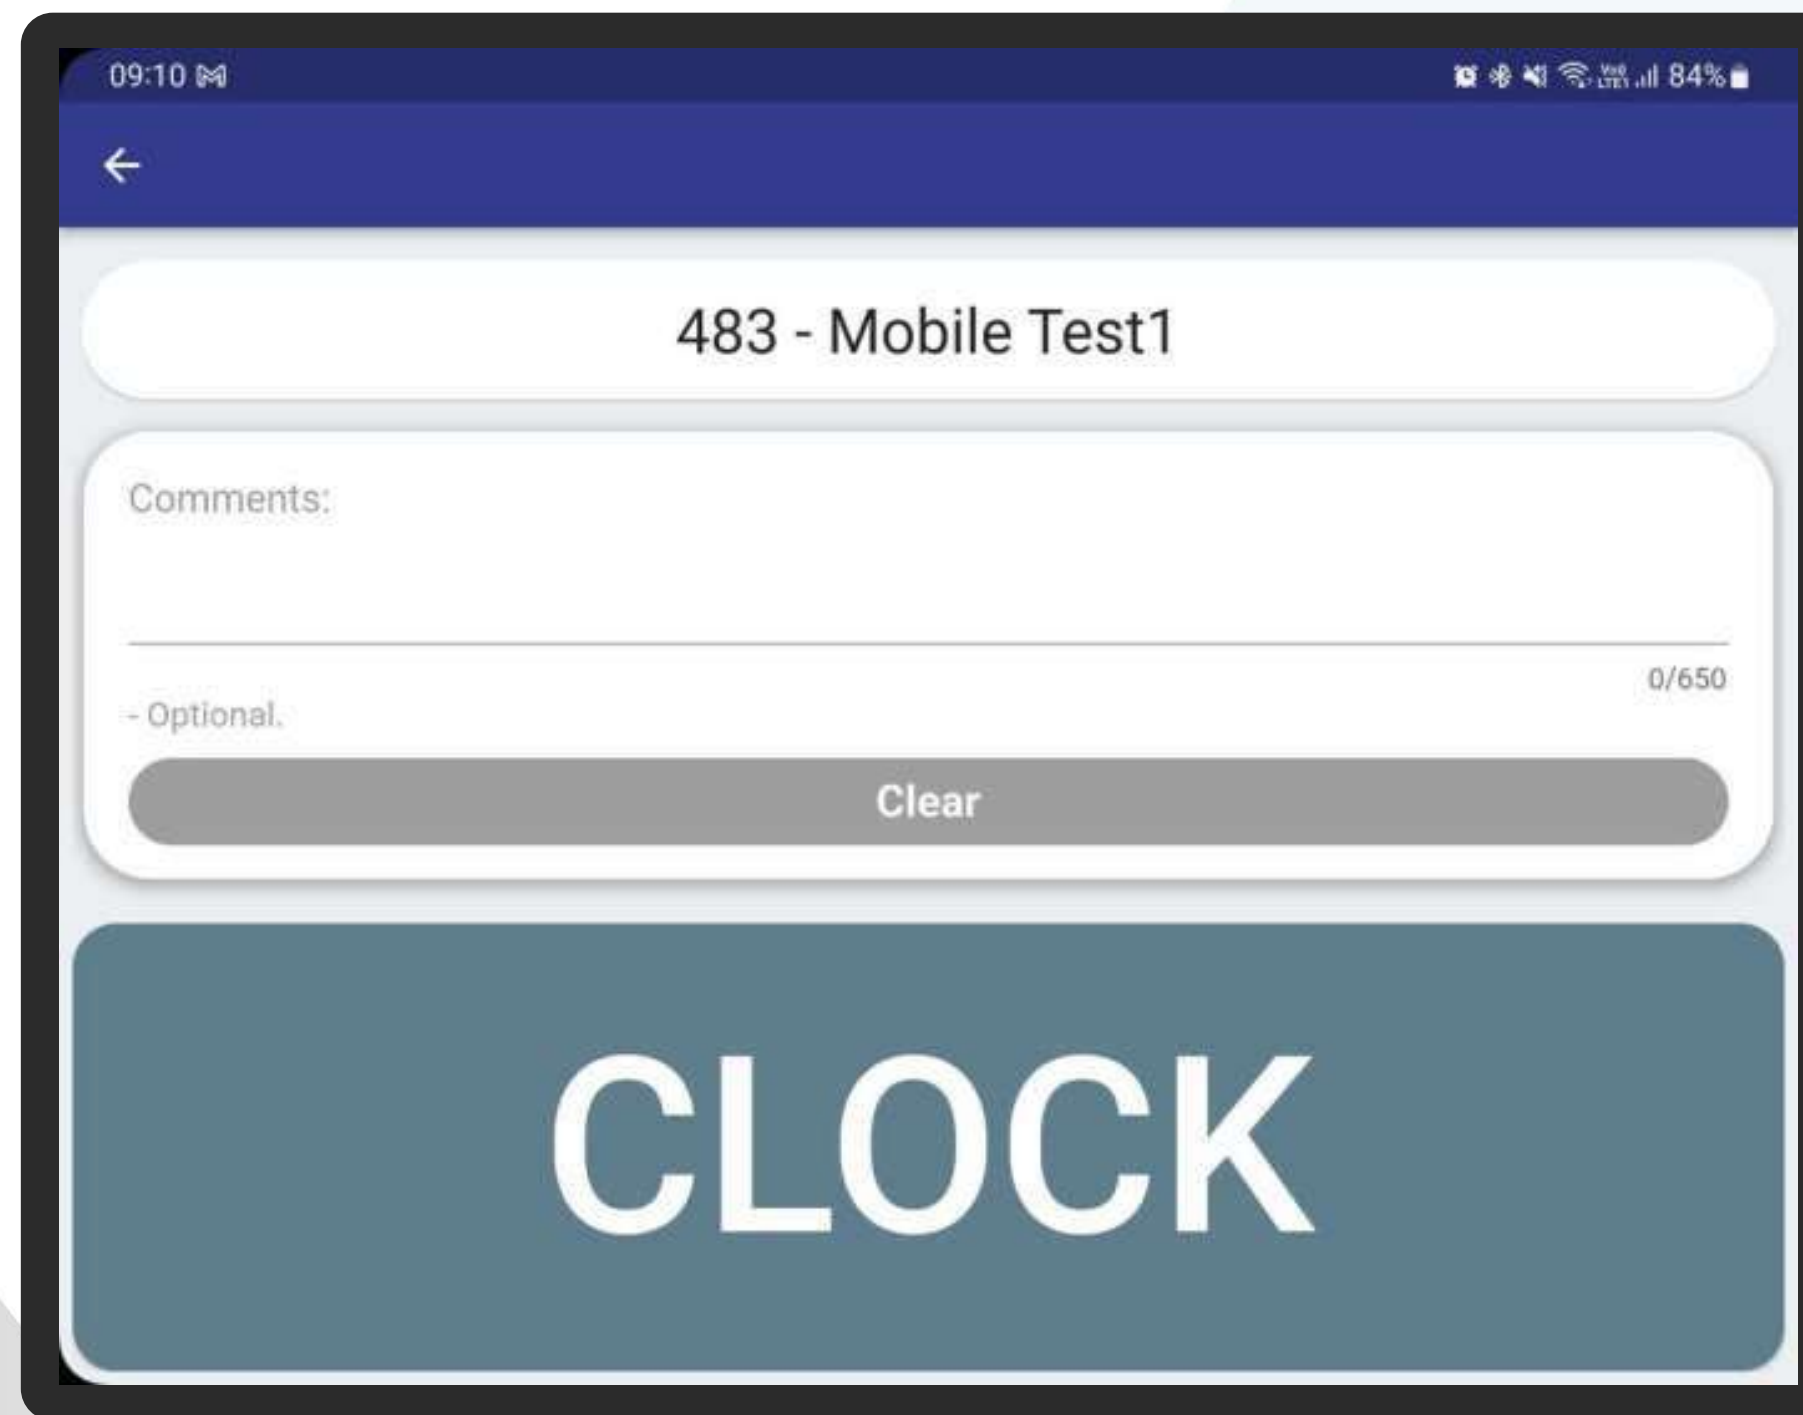

# Supervisor Clocking

The same steps 1-3 can be followed to download and open the BiopSyn App:

Select “Supervisor Login.” (Details provided).

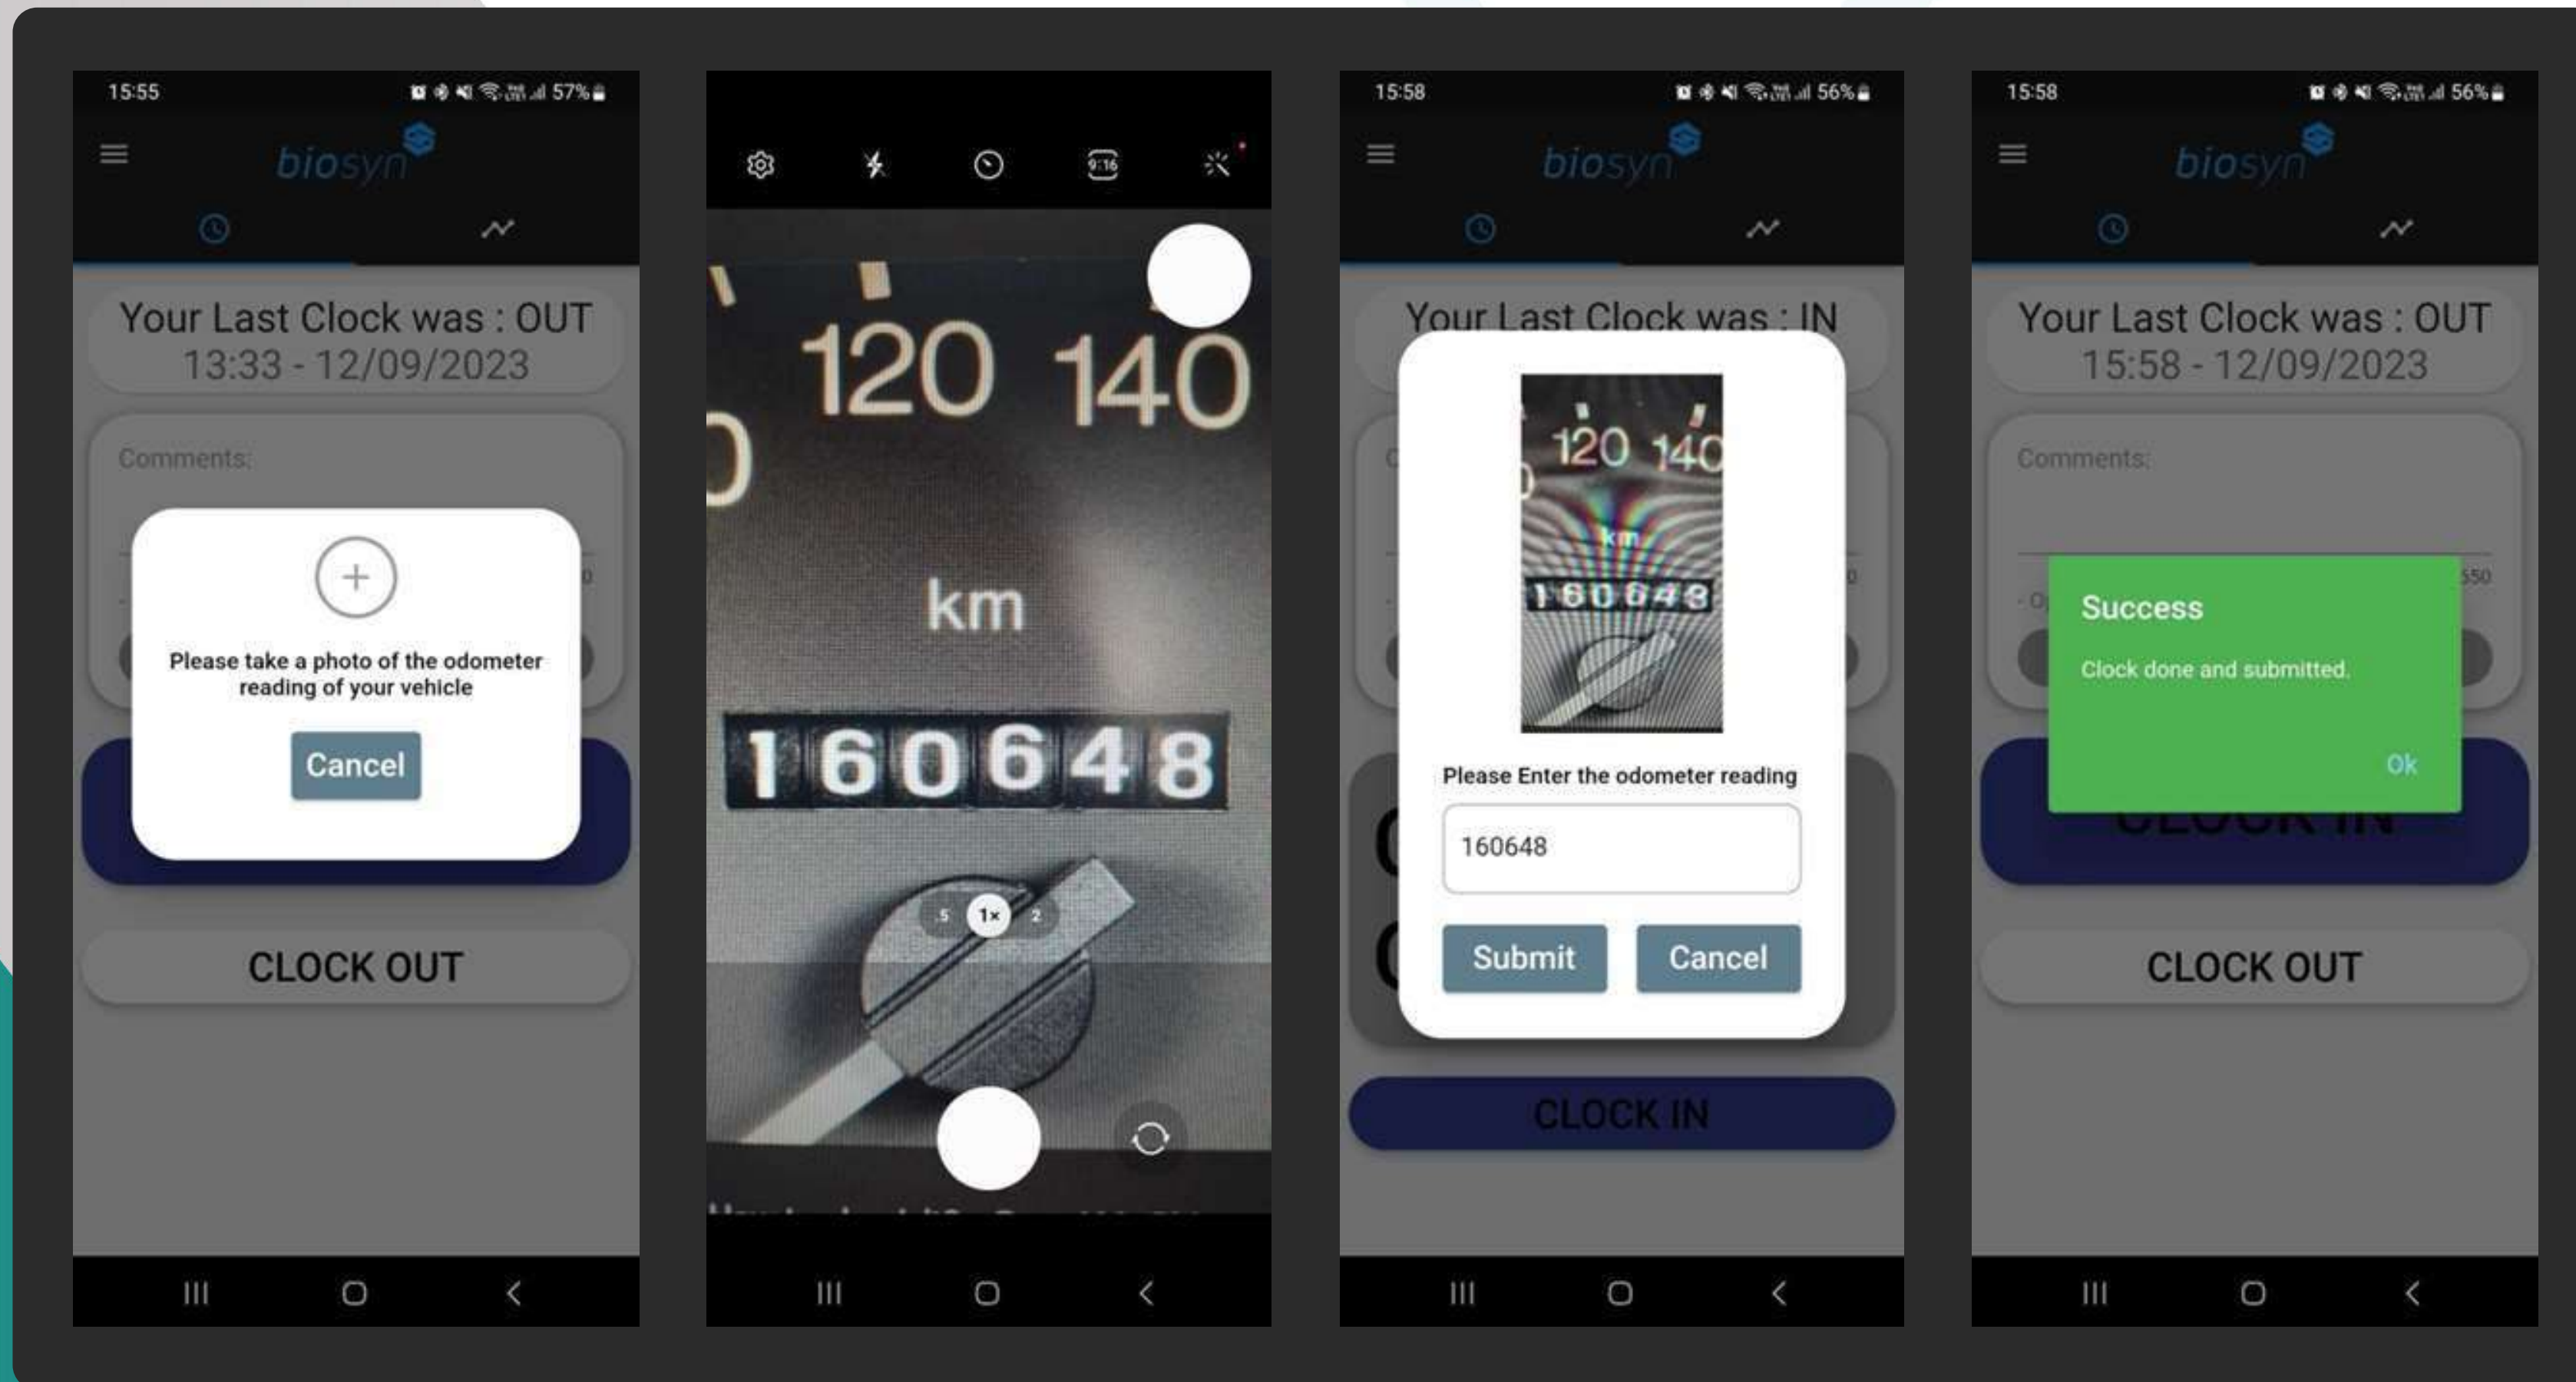

- As a Supervisor, you will gain access to a selection of departments and employees.
- Select/deselect: Tailor your view by selecting the departments you want to see or deselect those you don't need.
- Search and select the Employee in the department you would like to clock in/out.

- Select Clock In/Clock Out.
- Device camera will open to capture the Employee's images.
- The image will be securely submitted along with the time entry.
- Explore a variety of reports available on the BioSyn Time and Attendance software.

# Odometer Reading

- Log Odometer Readings  
Record accurate odometer readings for each vehicle in your fleet directly within the app.
- Photo Submission of the driver's odometer reading is submitted with the time entry.
- Seamless Integration.
- Easily access historical odometer readings for maintenance, compliance and reporting.
- Activate per company, department or employee.
- Switch between whether odometer reading is required or not.
